Dear Ms. Griffin:

Thank you for the opportunity to comment on the Site Inspection and HRS packages highlighted below. We have the following responses on these packages:

HRS and Narrative Summaries:

Water Supply Wells, 76th and Division, Kent Co.

The front page of the HRS package should have Bonnie White as the project contact, and not Jim Janiczek. The score of 28.31 appears to be representative of this site's conditions.

Coil Anodizers, Muskegon Co.

A score of 28.45 for the Coil Anodizers site is a "worst case" characterization of site conditions and appears to be appropriately scored.

State Disposal Landfill, Kent County

The information contained in your records and in the scoring package appear to be accurate. We would like to note here that the area of concern has enlarged since the FIT team completed their SI work. There is another dumping area to the east which is also on Waste Management Inc.'s property, and which was formerly owned by John Douthette--both mentioned in E&E's narrative summary. Several residential wells in the area have also been impacted but have not been conclusively linked to past dumping activities.

Ms. Jeanne Griffin

Site Inspection Packages:

San Juan Subdivision, Muskegon Co.
✓ Northeast Gravel Company, Kent Co.
Muskegon County WWTP Whitehall, Muskegon Co.

All three of these SI packages are accurate. We look forward to seeing the HRS packages in the near future.

If you have any questions regarding these sites, please telephone Ms. Denise Gruben at 517-373-4800.

Sincerely,

Andrew W. Hogarth, Chief
